New Products

Check out our list of contents containing NEW products. As always, we strive to manufacture a higher class of analytical standards at a fair price. Our focus is and always has been to create precise standards faster and more affordably than other manufacturers. When creating NEW products, Inorganic Ventures continues to keep in mind our customers' specific needs, and with this we will continue flexing to your specs.

Our NEW products are highlighted throughout our catalog with the symbol:

Quality

A history of accreditation. For more than 13 years, Inorganic Ventures has been accredited by A2LA to ISO 17034 & ISO 17025. These are the core standards of the analytical testing community, and Inorganic Ventures continues to lead the way in compliance to these quality standards. This means every CRM is engineered to be stable, compatible, NIST traceable and manufactured and tested under ISO 17034 & ISO 17025 guidelines.

Customs

Custom standards are Inorganic Ventures' specialty. Our catalog reveals only a fraction of the inorganic reference materials we can prepare. More than two thirds of our business is devoted entirely to preparing custom standards. As the leading manufacturer of custom inorganic standards, we've produced tens of thousands of unique blends for laboratories worldwide. It's our area of expertise, and perhaps the most prominent way in which we flex to your specs.

OTHER ACCREDITATION

And More...

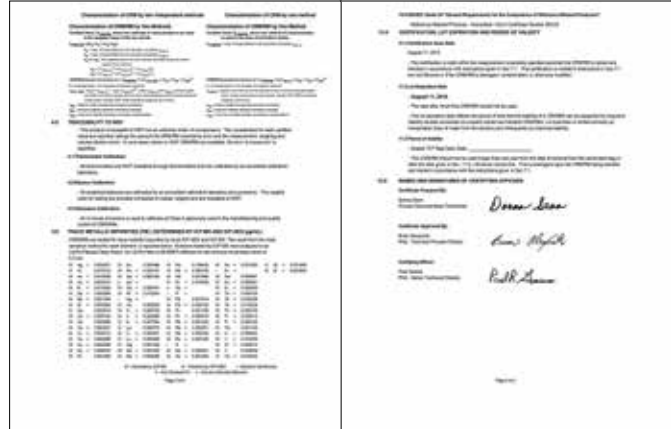

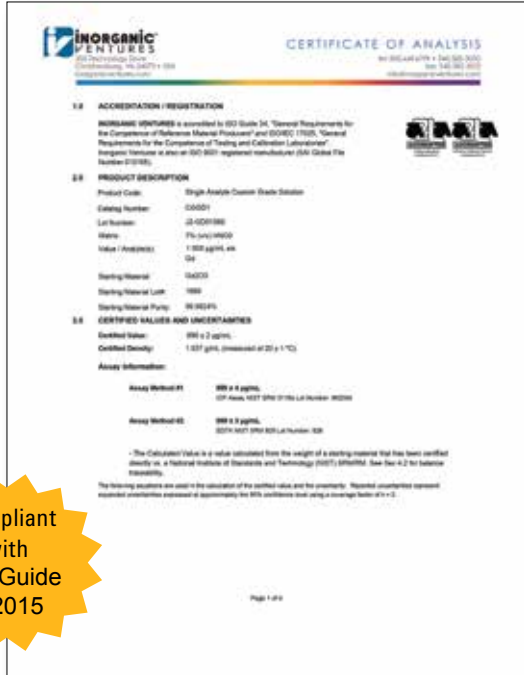

On the web. Our technical library has been expanding for over a decade. Topics include ICP operations, sample preparation, trace metals analysis and much more.* There you'll discover the best online tool for analytical chemists with our Interactive Periodic Table. It includes chemical compatibilities, preferred lines, major interferences and additional data for 70+ elements. esslab.com/tech-center

In the lab. All products ship with the required SDS and Certificate of Analysis. Additionally, our stock SDSs and CofAs can be found on our website for current lots as well as many older ones.

**For more new features, see page 9.*

WE FLEX TO YOUR SPECS CERTIFICATE OF ANALYSIS

Certificate of Analysis (CoA)

Nearly every CRM we manufacture includes a highly detailed Certificate of Analysis. As an ISO 17034, A2LA accredited manufacturer, we provide certificates that include extensive data to meet the quality requirements of any laboratory:

- **Traceability** — to specific NIST SRMs and lots
- **Certified Values** — based on two independent methods
- **Trace Impurities** — listed with the actual values
- **Uncertainties** — detailed information reported

You'll wonder how you ever got along without such a thorough certificate.
Contact us for a sample.

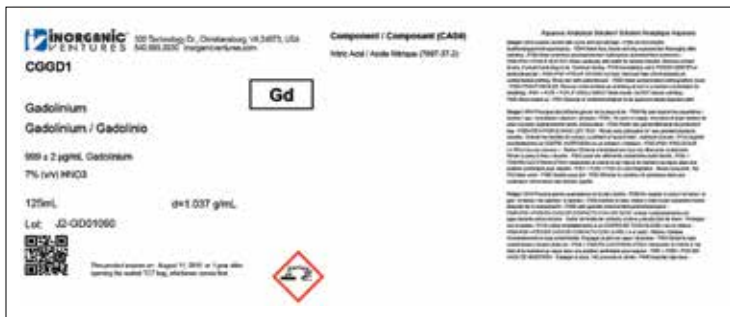

ONLINE

All CoA and Safety Data Sheet (SDS) information is now available online, 24/7. Inorganic Ventures is also pleased to announce that all of our products are GHS compliant and our SDSs are available in nine different languages.

Inorganic Ventures Label

We're here to help. We don't just manufacture inorganic CRMs, we also provide technical support when it is needed so you can do your job. Because inorganic chemistry is all we do, Inorganic Ventures has a dedicated technical support team that can assist you with hundreds of topics: sample preparation, method development, ICP and ICP-MS measurement issues and much more. You'll be amazed when you talk to a real person with a technical background ready to help you.

Our technical advisors are available to assist you Monday to Friday, 9:00 a.m. to 5:30 p.m.

We can assist you with...

- Sample preparation
- Spectral interferences
- Chemical compatibilities
- Various ICP & ICP-MS measurement issues

Technical Questions Answered

We've posted a variety of technical questions and answers pertaining to sample preparation, chemical stability and measurement.

OUR GUARANTEE

Unquestionable integrity.

We believe in our products. And we value our customers. That is why every order leaving our facilities includes our "Declaration of Integrity." This document guarantees your satisfaction. Simply said, if you're dissatisfied with your order for any reason and we cannot work through the problem with you, a full refund will be issued, no questions asked.

INORGANIC VENTURES[®]
Declaration of Integrity

While our reputation is nearly perfect, we are not infallible. That is why every order we ship includes this document. Herein we state, in no uncertain terms, that we are 100% accountable for the quality of our standards and service.

Therefore, if you are dissatisfied with your order for any reason, tell us. We will resolve the situation in whatever way works best for you:

- A full refund
- Complimentary technical services
- A replacement item rushed to you at no cost

Our company was founded on integrity. If our standards are not measuring up to yours, we want to know.

TCT™

TRANSPIRATION CONTROL
TECHNOLOGY

The cornerstone of the scientific community is accuracy. That's why Inorganic Ventures has always been committed to producing the industry's most exact Certified Reference Materials.

But our control...and the control of every standard manufacturer...ends shortly after a standard is calibrated and packaged. We are improving the way we deliver our quality standards.

What is transpiration?

Transpiration refers to the passage of water vapor through the walls of a container and/or evaporation from the container opening. Transpiration results in an increase in the concentration of the CRM/RM.

What is the solution?

Transpiration Control Technology extends the shelf-life of the product. Inorganic Ventures uses a specially designed aluminized bag that prevents an increase in concentration of the CRM/RM until the TCT bag is opened.

How it works.

The sealed TCT bag stops the loss of water vapor from the bottle when equilibrium is reached inside the bag.

Has the product changed?

The product has not changed, it is the same high-quality product you have come to depend on from Inorganic Ventures. It is the same but only better. TCT is an investment we are making to extend shelf life and give you more control at no extra charge. Our products and unconditional guarantee remain the same.

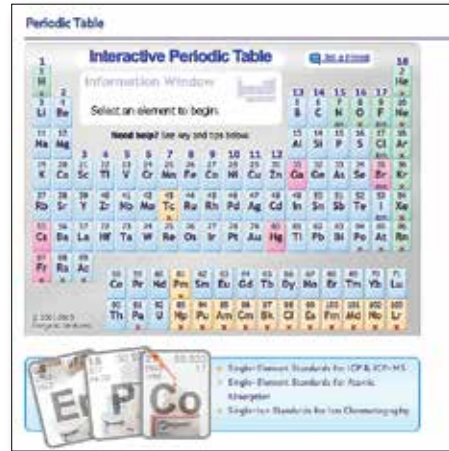

What this means for you.

When you order stock standards from Inorganic Ventures, your product will be delivered in the TCT bag. This means you will be in control of the expiration date. Upon receiving the product, do not open the TCT bag until you are ready to use. To find out how long the product can be in the TCT bag before it expires, simply check the lot expiration found on the bottom left of the front label. Your product will expire on that date or one year after opening the sealed TCT bag, whichever comes first.

TCT™
TRANSPIRATION CONTROL TECHNOLOGY

Transpiration Control Technology extends the shelf life of the product. Inorganic Ventures uses a specially designed aluminum bag that prevents an increase in concentration of the analyte until the TCT bag is opened.

YOUR EXP.
In effect, this puts you in control of the expiration date, which is one year from opening the sealed TCT bag or the lot expiration date, whichever comes first.

HOW IT WORKS

The sealed TCT bag slows the loss of water vapor from the bottle when equilibrium is reached inside the bag. Inorganic Ventures guarantees the integrity of this product one full year from opening the sealed TCT bag. You can store your TCT bags in any ambient conditions without compromising quality or making transpiration.

HAS THE PRODUCT CHANGED?
NO
It is the same high-quality product you have come to depend on from Inorganic Ventures.

SAME AS ALWAYS.
TCT is an investment we are making to extend shelf life and give you more control of no extra charge. Our products and unconditional guarantee remain the same.

CUSTOM STANDARDS

Speed. Credibility. Cooperation.

We can prepare almost any inorganic blend within the boundaries of science. Whether you need two analytes or 20, milliliters or liters, 0.001 $\mu\text{g}/\text{mL}$ or 10,000 $\mu\text{g}/\text{mL}$, we can make it for you — fast. It's our specialty.

Our catalog reveals only a fraction of the inorganic solutions we're able to make. Much of our business is devoted entirely to custom blending. Laboratories across the globe trust us exclusively to manufacture their inorganic standards.

Fast

Our specialization in custom blending means faster service without sacrificing quality. Our experienced technicians can identify stability and compatibility issues before production even begins. Almost every blend we make is prepared, certified and shipped in five to ten business days.

Credible

Since 1999, our tri-tier ISO quality system has ensured that every standard we make is engineered to be stable, compatible and easy to use. These international accreditations guarantee that you're receiving a true Certified Reference Material.

- **ISO 17034** ensures the reliability of our reference materials.
- **ISO 17025** ensures the competency of our laboratory.
- **ISO 9001** ensures the quality of our services.

Cooperative

Speed and credibility often come at a higher price. We offer specialized purchasing options and other incentives to better accommodate your budget. Just ask. We're happy to manufacture nearly any solution in bulk quantities. This prevents the need for repeat labor, which means you'll save money. Plus, there's no waiting when you reorder the material — it'll ship the day you order.

1

REQUEST your customs.

Generate and request any number of custom solutions at esslab.com. Or call in your request to 01702 555577 and discuss your needs with a specialist. You may also fax the quotation request form to 1702 551772

2

REVIEW our quotation.

Often you'll receive our pricing within hours. If you like what you see, place your order by phone, fax or web. Each quote will contain pricing for several different quantities so you can choose the quantity that fits your budget.

3

RECEIVE your order.

Ninety-nine percent of the custom orders we prepare ship in five to ten business days. If we expect it to take longer, we'll let you know. When your need is truly urgent, we offer RUSH manufacturing. Plus, everything we make is backed by our Declaration of Integrity. Your satisfaction is 100 percent guaranteed for the lifetime of the solution.

For the pharmaceutical industry, Inorganic Ventures has developed CRMs to comply with the United States Pharmacopeia (USP) general chapters on elemental impurity USP <232> limits and USP <233> procedures. These methods are for testing inorganic impurities in pharmaceutical products by ICP. The International Conference on Harmonization (ICH) Working Group on Elemental Impurities is in the process of developing a harmonized approach for controlling these impurities as well.

Now, YOU control the expiration date.

With TCT, concerns about shipping and storage conditions are eliminated, as transpiration is no longer an issue. This saves you money and simplifies research by removing the need to constantly inventory and restock CRMs.

Find out more at esslab.com/tct.

If you've been searching for an atypical Ion Chromatography standard, look no further.

Over the years, we've developed the most complete line of IC standards on the market. Our technicians have stabilized more than a dozen rare anion and cation standards that you won't find anywhere else.

Product Innovation —

An integral part of how we flex to your specs.

- ✓ Up to four-year shelf life
- ✓ Traceable to NIST SRMs
- ✓ Produced under ISO 9001
- ✓ Produced under ISO 17025
- ✓ Produced under ISO 17034
- ✓ Assayed by validated Wet Chemical procedures
- ✓ Assayed by validated IC procedures

CLP Graphite Furnace Standards

Custom EPA standards are available upon request.

We can create any CLP Graphite Furnace Standard to best fit your needs.

Should you ever have a problem with any standard, Water QC or otherwise, let us know. We'll immediately investigate the problem by testing a retained sample of your solution. If the error is on our end, you'll be offered a full refund or a free replacement — your choice.

Our priority is your total satisfaction.

Customer Satisfaction — The primary reason we flex to your specs.

At times, Wet Chemistry involves some difficult and unusual techniques. If you find yourself in a bind, give us a call. One of our experts will be happy to assist you. Plus, we offer analytical advice and in-depth technical guides on our website, esslab.com.

- ✓ Up to four-year shelf life
- ✓ Traceable to NIST SRMs
- ✓ Produced under ISO 9001
- ✓ Produced under ISO 17025
- ✓ Produced under ISO 17034
- ✓ Assayed by optimal validated procedures

Shared Knowledge —

The most rewarding part of how we flex to your specs.

Each pH standard is manufactured to be compatible with your instrumentation and meets all requirements for calibration by a true Certified Reference Material. Each standard is traceable to a NIST SRM and engineered for homogeneity and long-term/short-term stability testing. Manufactured under our ISO 17025 and ISO 17034 accreditations and ISO 9001 registered, each pH standard comes with a CoA with a temperature chart for your convenience. Detailed error budgets provide accurate and consistent certified values and uncertainties. Each product is packaged in our TCT technology, where each lot has up to a three- to four-year shelf life and a one-year* expiration date from opening. Also provided is a GHS-compliant SDS and GHS label and temperature chart on the product and TCT foil bag.

Dissolution Reagents

Dissolution Reagents are designed for the preparation and measurement of samples containing silica mixed with fluoride insoluble elements, including zeolites, alumina and/or silica based catalysts, sand, limestone, coal fly ash and talc. The dissolution of these types of materials requires HF. See the article titled *Elemental Analysis of Zeolites* on our website for more information.

Acid Dissolution Reagent	
UA-1-500ML	Volume: 500 mL
Recommended for the dissolution of aluminosilicates, such as zeolites.	

Acid Dissolution Reagent [†]	
UA-2-500ML	Volume: 500 mL
Designed to dissolve coal fly ash and aluminosilicates.	

Acid Dissolution Reagent*	
UA-3-500ML	Volume: 500 mL
Similar to UA-2, except UA-3 can handle higher levels of iron.	

Acid Dissolution Reagent	
UA-4-500ML	Volume: 500 mL
Designed for the dissolution of aluminosilicates, such as zeolites, containing moderate to high levels of fluoride-insoluble elements.	

Acid Dissolution Reagent	
UA-5-500ML	Volume: 500 mL
Designed to handle samples high in calcium, such as limestone.	

Acid Dissolution Reagent	
UA-6-500ML	Volume: 500 mL
Designed for samples high in magnesium, such as dolomite.	

Acid Dissolution Reagent	
UA-7-500ML	Volume: 500 mL
Designed for the determination of trace elements in samples containing predominately silica, such as silica gel.	

[†]Boron cannot be determined.

*Boron and Phosphorus cannot be determined.

Neutralizers & Stabilizers

These products are applicable to the determination of aluminosilicates containing various elements. For details, refer to the description for Dissolution Reagents on the preceding page.

Stabilizing Reagent	
UNS-1-500ML	Volume: 500 mL
UNS-1-2.5L	Volume: 2.5 L
Designed for use with UA-1.	

Stabilizing Reagent	
UNS-2-SET	Volume: 2.5 L
Two reagent set consisting of equal amounts of UNS-2A and UNS-2B. Recommended for use with UA-2, UA-3, UA-4, or UA-5.	

Stabilizing Reagent	
UNS-2A-2.5L	Volume: 2.5 L
Stabilizing Agent	

Stabilizing Reagent	
UNS-2B-2.5L	Volume: 2.5 L
Stabilizing Agent	

Stabilizing Reagent	
UNS-3-2.5L	Volume: 2.5 L
Designed for use with UA-7.	

Stabilizing Reagent	
UNS-4-2.5L	Volume: 2.5 L
Prevents salting-out effects from borate fusions and/or boric acid treated HF preparations. Also recommended for use with UA-6.	

Stabilizing Reagent	
UNS-100-500ML	Volume: 500 mL
UNS-100-2.5L	Volume: 2.5 L
For use with all acids and applications. Improved capacity. Contact us for more information.	

Stabilizing Reagent	
UNS-300-2.5L	Volume: 2.5 L
For use with all acids and applications. Improved capacity. Contact us for more information.	

Fusion Fluxes

Lithium Carbonate	
FF-LI2CO3-500G	Volume: 500 g
FF-LI2CO3-2.5KG	Volume: 2.5 Kg
See section 13 of the Reliable Measurements Guide found on our website for a sample preparation method designed to work perfectly with this product.	

CERTIFIED TITRANTS AND REAGENTS
